

Enchanted Forest

Shader Building (Water, Land) - Unreal Engine 5, Personal Projcet
2022

Concept

Enchanted forest environment with a realistic stream

Used Software

Unreal Engine 5

Project Description (Personal Project)

This project was to create an enchanted forest environment.
Landscape, lighting, camera, and blueprint work to build materials used for water expression were handled to finish the project.

Mainly focused on water material building with BP and lighting of both day and night versions.
This environment is meant to be interactive and to provide a mystic experience to players with a sense of immersion.

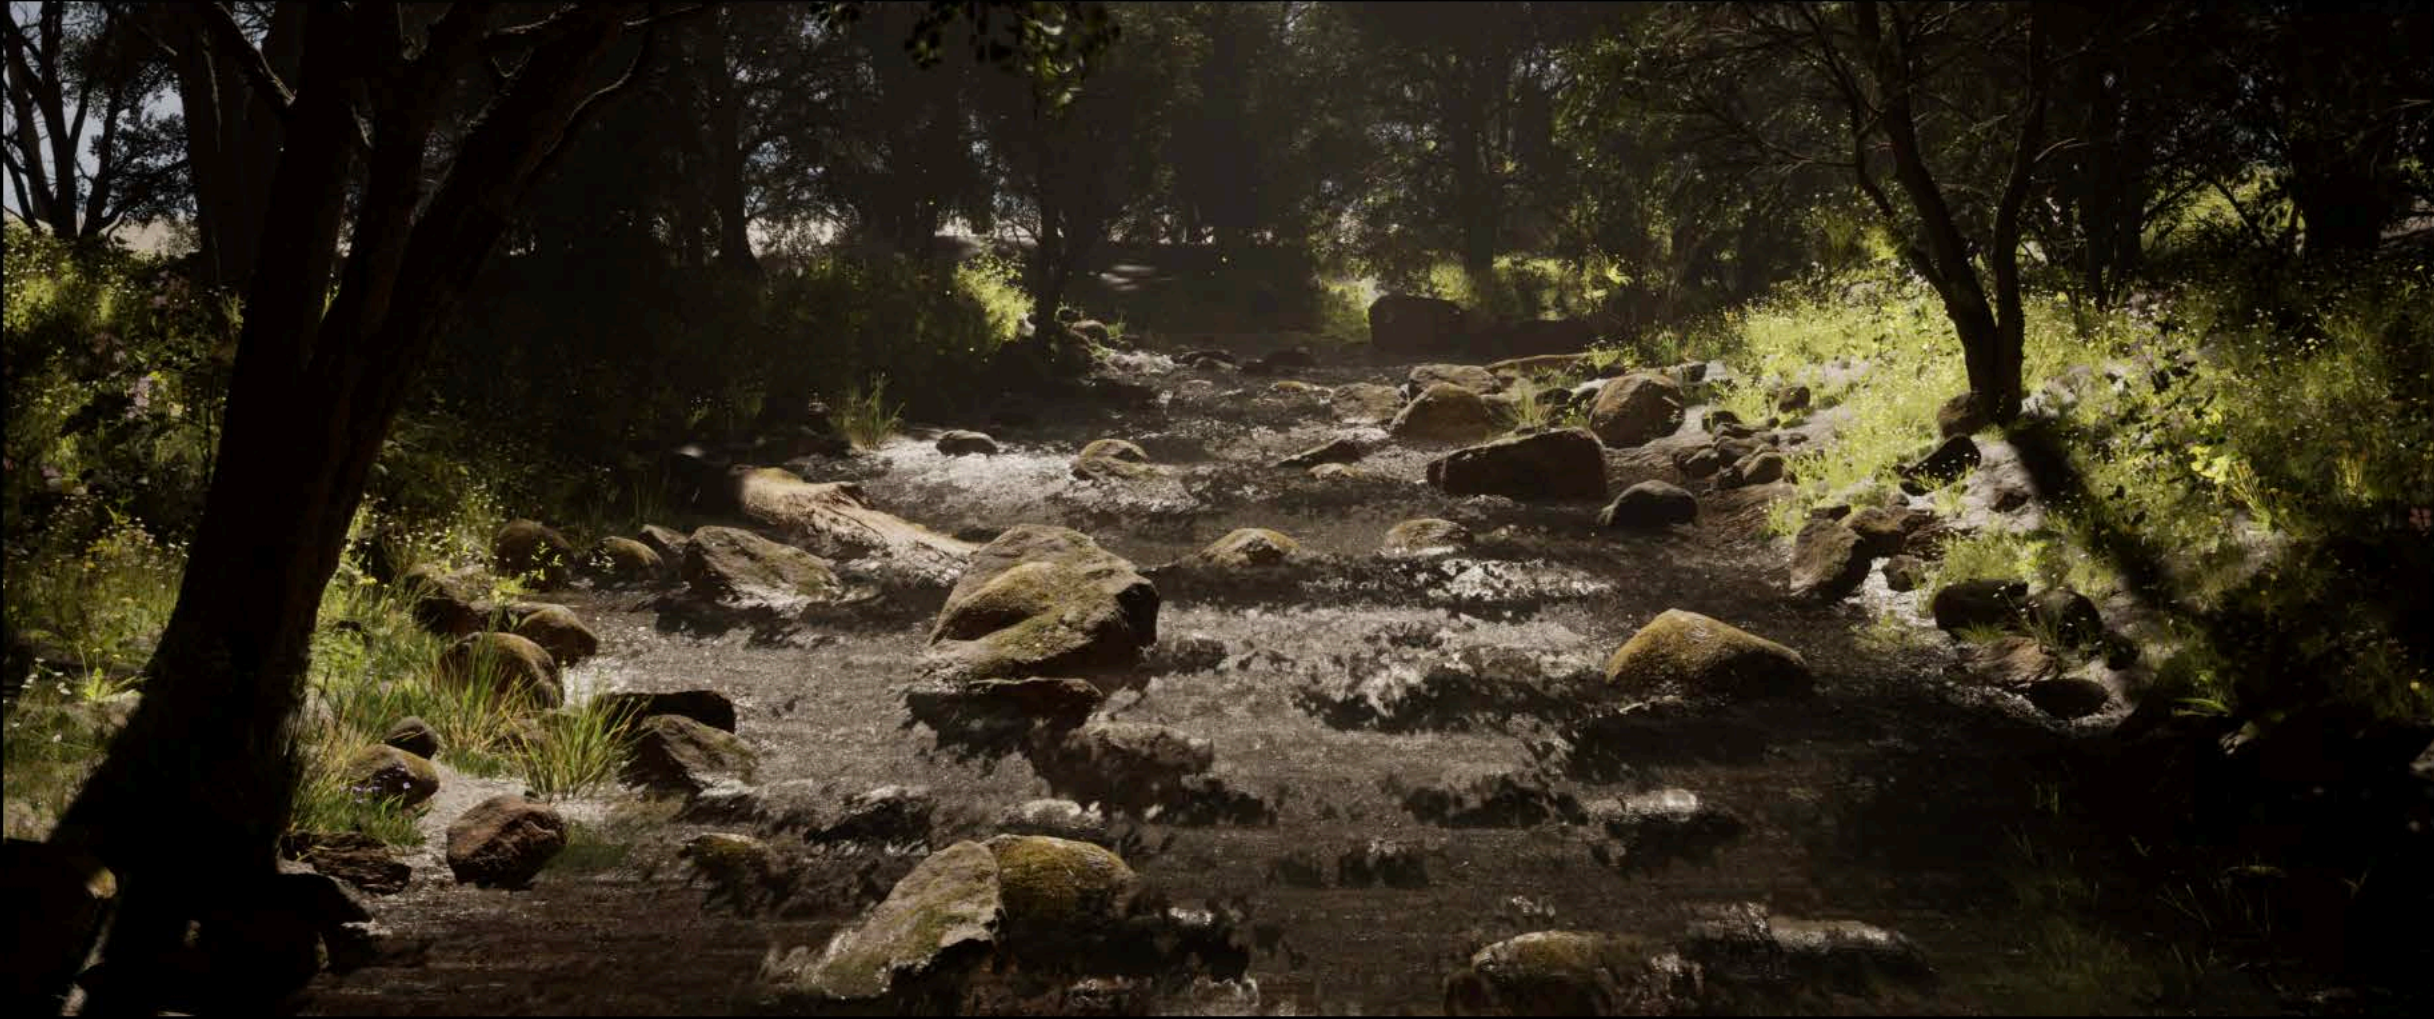

Goal

1. To create aesthetically refined scenes(day/night) of forest
2. To create an adjustable water shader

- Received professional feedback from Gerardo Contreras (Surface and LRC Artist)

- Assets from Unreal Engine Marketplace

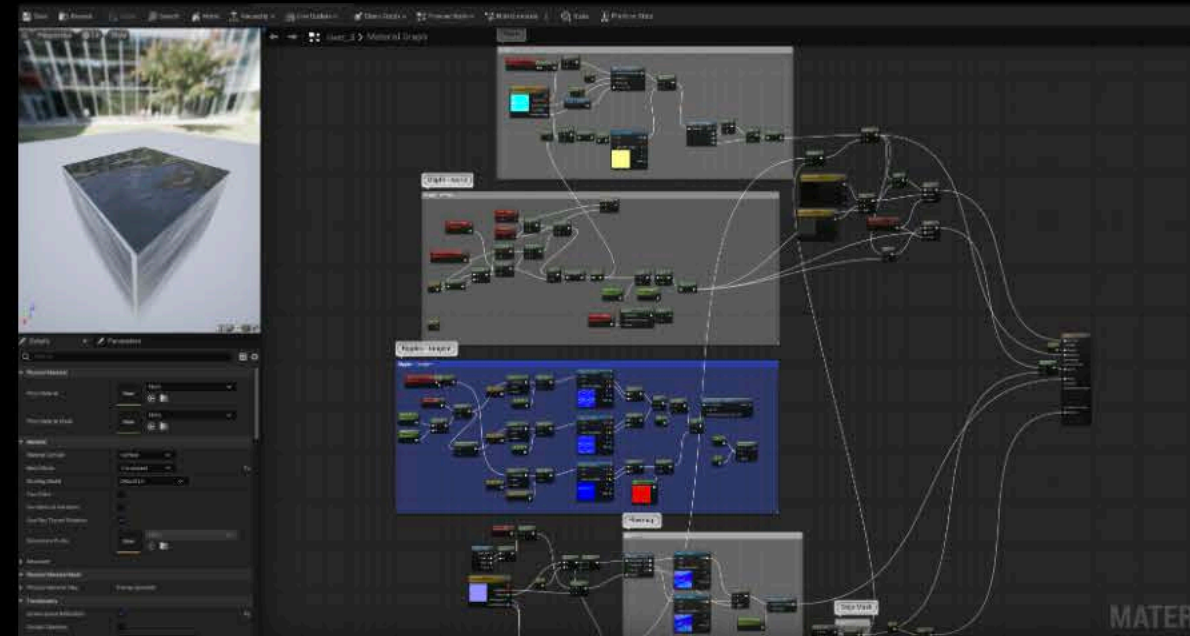

Shader Building (Blueprint)

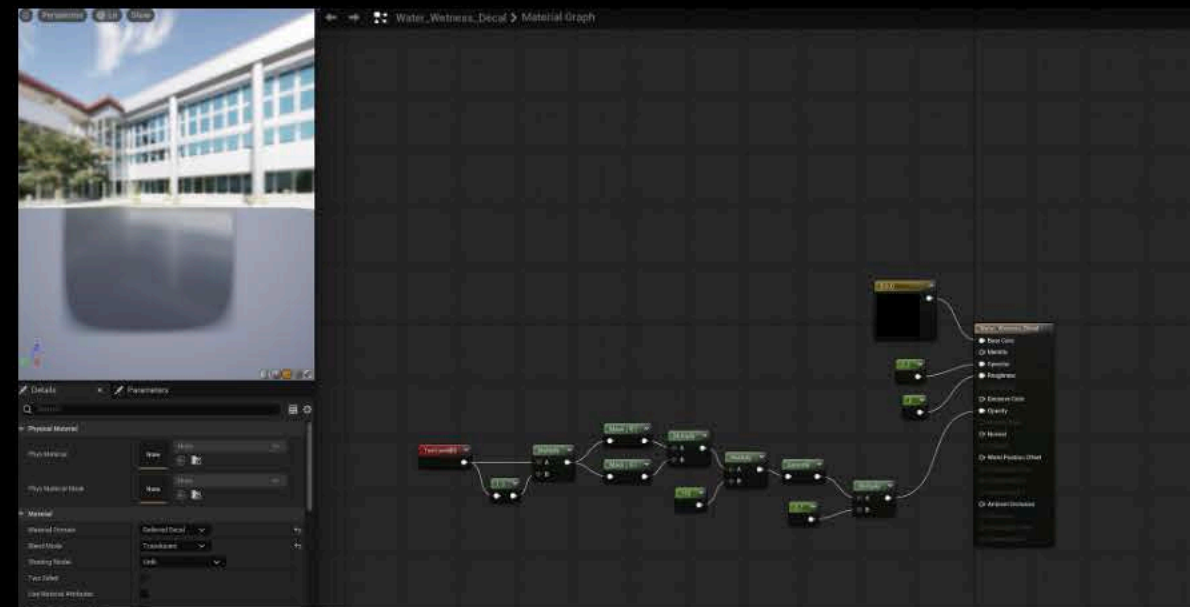

Water Shader

Water material created with Blueprint
