Education

Carnegie Mellon University

Pittsburgh | 2022–2024
Master of Entertainment Technology
GPA: 3.93/4.0

Sogang University

Seoul | 2017–2022
B.A.S. in Art & Technology
B.A. in Psychology

Skills

Design & AI

End-to-end product design,
High-fidelity Prototyping, Rapid prototyping,
Usability Testing, Cross-functional
collaboration, AI-Assisted Development
(LLMs, Claude), Interaction Design, Visual
Design, 3D Prototyping, VR Experience
Design, Procedural Workflows

Awards & Recognition

80LV Showcase Competition

Granny's Baking Kitchen (Unreal)
1st Place Winner, 2026

Grant for AI Course Development

\$5,000, University of Miami, 2025

Communication Arts Interactive

Flow, Winner, 2025

SXSW Innovation Awards

Flow, Finalist & Showcase, 2025

Dreamin Hanwha Blockchain Hackathon

ViewDeFi, 1st Place Award, 2021

AR/VR Prototyper and **Interactive Designer** specializing in spatial interaction, Unity/Unreal prototyping, and user-centered immersive experiences. Experienced in translating ambiguous concepts into functional demos, identifying UX friction through playtesting, and iterating across design, technical, and visual systems.

Experience

University of Miami | XR Creative Director & Lecturer

Aug 2024 – Present · Coral Gables, FL

- Directed **6+ VR/XR projects** at a simulation lab, conducting hands-on UX evaluations to identify interaction friction and guiding teams to implement solutions.
- Instruct courses including Creative Coding (C#/Unity), Game Design, Interaction Design, and 3D Production.

Universal Creative | Interactive Media Design Intern

Sep 2023 – Dec 2023 · Orlando, FL (Super Nintendo World)

- Translated CAD data and 2D concepts into **1:1 scale 3D prototypes** in Unreal Engine, allowing stakeholders to validate spatial flow, scale, and guest experience.
- Partnered with cross-functional teams and navigated Nintendo's strict IP approval pipeline to establish high-fidelity visual targets, ensuring seamless translation from digital concept to physical product.

S-SHO | Founding Product Designer

Mar 2019 – Jun 2021 · Seoul, Korea (Freelance)

- Collaborated with the Lead Designer to establish a UI design system and translate initial wireframes into polished, high-fidelity interfaces.
- Led **0→1 design** of "Fashion MBTI" viral marketing project; employed an agile, execution-focused approach by bypassing traditional low-fidelity stages to rapidly deliver a polished, high-fidelity experience.

Projects

Swampocalypse VR | Spatial UX Lead

Aug 2025 – Dec 2025

- Identified UX friction from FOV-blocking UI in a 6-DOF VR experience and redesigned it into diegetic UI, clearer onboarding, and more comfortable guidance.
- Refined visual hierarchy and onboarding based on user testing to improve comfort, readability, and immersion for a Steam-ready release.

Flow | XR Prototyper

Jan 2024 – May 2024

- Iterated on controller-free gesture interactions through **70+ playtests with 100+ users**, identifying friction points and collaborating with engineers to refine the flow.
- Developed real-time visual feedback systems, including dynamic fog and outline cues, to guide user attention across a large-scale curved-screen environment.
